Innovations in Wound Care

Now there's a safe and effective way to control bleeding fast.

- For all cuts and abrasions
- For nosebleeds
- Acts in less than a minute
- Easily washed off with water
- For all age groups

10 STERILE PACKETS
8 - 1 in x 1 in (2.5 cm x 2.5 cm)
2 - 2 in x 2 in (5.1 cm x 5.1 cm)

100% Natural Fiber Cellulose
A new concept to control bleeding. Gauze turns into a gel to seal the wound.

Tested and recommended by consumers.

BloodSTOP®

CONTROLS BLEEDING FAST

BloodSTOP® water soluble hemostatic gauze stops bleeding in less than a minute – whether from a minor wound or abrasion, razor cut, or nosebleeds. Upon contact with blood, BloodSTOP speeds coagulation and expands into a gel that adheres to the surface to help seal the wound. The protective transparent seal aids in wound monitoring (eliminating the need to remove bandages and disturb the wound surface). Made of 100% natural cellulose, BloodSTOP can be washed off with water.

A MUST FOR FIRST AID KITS

- For all cuts and abrasions
- For nosebleeds
- Acts in less than a minute
- Easily washed off with water
- For all age groups
- Adheres to wound without the discomfort of adhesive
- Water soluble
- Minimizes blood loss
- Non-irritating
- Biocompatible
- Biodegradable

“Thank you BloodSTOP! My nine-year-old son suffers from frequent nosebleeds. I tried another product, but it irritated the inside of his nose that I discontinued using it. The next time my son had a nosebleed, I applied BloodSTOP and within seconds a blood clot formed with no discomfort to my son. Now whenever my son has a nosebleed the first thing he says is, ‘Can we use that new stuff?’ Thank you so much for this wonderful product!”

– Lori, Lakewood, NJ

“It’s great that this product was finally invented. The way BloodSTOP works is fantastic. When I accidentally caught my hand in a glass door, I used BloodSTOP and the bleeding stopped as soon as I applied it.”

– Patricia Parker, Phoenix, AZ

“I’m a heart patient and I take six different medications, including blood thinners¹. Now the smallest cuts and scrapes cause me to bleed profusely. I tried a liquid bandage, but I had trouble getting the applicator out of the wrapper. My wife and I found it difficult to open the small bottle of fluid and pour it on the applicator. In frustration, I dripped it directly on the cut, which didn’t work, so I just threw it away. BloodSTOP works. It’s quick and easy to use, and it can be easily cut to a size to fit the wound, so there’s no waste, which saves money.”

– John V. Chown, Tujunga, CA

¹ This testimonial statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease requiring blood thinner medication.
